MOLDED COMPONENTS

STORAGE AND HANDLING RECOMMENDATIONS FOR GORE® PACKAGING VENTS MOLDED COMPONENTS

Gore is committed to providing high quality products that maximize application performance. To ensure the long shelf life of GORE® Molded Components, the following storage and handling recommendations are advised:

STORAGE RECOMMENDATIONS

GORE® Molded Components consist of PE (Polyethylene), PP (Polypropylene) and PTFE (Polytetrafluoroethylene). These polymers are considered stable when kept under normal storage conditions. Therefore, it is recommended to:

- Store all products in their original packaging in a clean environment.
- Keep the vents stored in a location that does not experience extreme temperatures and temperature changes.

SHELF LIFE

If storage and handling recommendations are followed correctly, no changes in the venting performance of GORE® Molded Components are expected for several years.

HANDLING RECOMMENDATIONS

Please note that the membrane may be damaged if not handled correctly, which can lead to leaks. Therefore, please follow the following handling recommendations:

- Avoid touching, compressing or squeezing the membrane.
- It is recommended to wear latex-free gloves or finger cots when handling GORE® Molded Components.
- Avoid contact with sharp objects.
- Check laminate compatibility prior to use with chemicals (according to our product information for application testing).
